Art Unit: 1205

Claims 1-10, 35 and 51-90 are presented for examination.

Applicant's preliminary amendment filed March 18, 1997 and information disclosure statements filed October 14, 1997 and July 23, 1998 have been received and entered.

Applicant's election filed July 1, 1998 in response to the restriction requirement of May 26, 1998 has been received and entered. The applicant elected claims 1-10, 35 and 51-55 and canceled claims 11-34 and 36-50.

Claim Rejections - 35 U.S.C. § 112

Claims 53 and 55-90 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 53 and 55 are rendered indefinite because rely on figures that are not disclosed in the claims. Claim 53 does not disclose or show what is a capsaicinoid analog. Claim 55 does not disclosed or show what is a piperidine constituent.

Claims 56-90 are rendered indefinite because they depend upon canceled claims 15, 16, 45, 47 and 48.

Claim Rejections - 35 U.S.C. § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10, 35 and 51-90 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chaurasia et al. (R) and Jain et al. (S) .

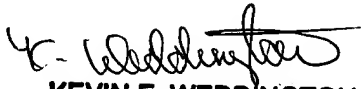

The two cited references teach a pepper plant of the species *Piper nigrum* possesses antifungal activity against various pathogenic and non-pathogenic fungi. (See the abstract and the applicant's supplied copy)

The instant invention differs from the cited reference in that the cited reference do not teach the pepper plant is effective against specific types of fungi as disclosed in applicant's claim 3. However, one skilled in the art would have been motivated to use the pepper plant to treat the specific fungi of claim 3 since the pepper plant is well-known to possess antifungal activity in the absence of evidence to the contrary.

Claims 1-10, 35 and 51-90 are not allowed.
